

Colony maintenance – contract breeding isolator services

For situations in which it is not practical for you to breed and maintain your colonies within your own facility, Envigo provides the ability to genotype models, colony breeding and maintenance services within our isolator operations.

Our team of experts will work closely with you to understand your needs and develop a customized colony management plan and health surveillance program.

Service	Requirements	Project outcome
+ Colony maintenance isolator rental	<ul style="list-style-type: none">+ Required health monitoring report+ Required health surveillance+ Required colony size	<ul style="list-style-type: none">+ Routine animal husbandry / isolator / week+ You direct how colony is maintained
+ Contract breeding isolator rental	<ul style="list-style-type: none">+ Required health monitoring report+ Required health surveillance+ Required colony size	<ul style="list-style-type: none">+ Routine animal husbandry / isolator / week+ Colony size adjusted to meet your required animal supply demand
+ Quarantine isolator rental	<ul style="list-style-type: none">+ No required health monitoring report to enter quarantine isolator	<ul style="list-style-type: none">+ Routine animal husbandry / isolator / week+ Health monitoring conducted to determine health status of colony

Genetic testing

Whether you are studying animal models of disease, tumor cell lines, embryonic stem cell lines, or other tissue models, you can be confident that Envigo's genetic testing program has a wide variety of services to help you facilitate your discovery process.

- + Genotyping of colonies housed in our contract breeding facilities
- + Genetic background analysis
- + Speed congenics with colonies located in our facilities with genetic test performance
